ELSEVIER

Volume 66, Nos. 1–3, April 1997

Journal of
Materials
Processing
Technology

Contents

Recent research and development in metal forming in Japan 1
K.-I. Matsuno

Pulsed laser processing of plasma sprayed thermal barrier coatings 4
K.A. Khor, S. Jana

A simplified approach for evaluating bendability and springback in plastic bending of anisotropic sheet metals. 9
D.-K. Leu

Efficient and stable grinding of ceramics by electrolytic in-process dressing (ELID) 18
B.P. Bandyopadhyay, H. Ohmori, I. Takahashi

A dynamic quench model for strength predictions in heat-treatable aluminum alloys 25
R.C. Dorward

The upsetting behavior of semi-solid aluminum material fabricated by a mechanical stirring process 30
C.G. Kang, J.H. Yoon, Y.H. Seo

Comparison of flow patterns between plasticine and aluminium alloys in hot-precision forging 39
H. So, Y.F. Lin, K.W. Huang

A force model of a single-point tool with a chamfered main cutting edge when wearing has occurred 49
C.-S. Chang, K.-H. Fuh

An investigation of process parameters in the dam-bar cutting of integrated circuit packages 63
W.B. Lee, C.F. Cheung, L.K. Chan, W.M. Chiu

Ageing behaviour of aluminium alloy-glass particulate composite 73
Z.M. El-Bradie, A.N. Abd El-Azim

A finite-element analysis on the upsetting process of semi-solid aluminum material 76
C.G. Kang, J.H. Yoon

Manufacture of a matrix heat exchanger by diffusion bonding 85
J. Krishnan, K. Bhanumurthy, P.S. Gawde, J. Derose, G.B. Kale, G. Srikrushnamurthy

A study of the effect of inclusion content of the machinability and wear characteristics of 0.24% carbon steels. 90
S.B. Singh, A.K. Chakrabarti, A.B. Chattopadhyay

Investigation on unsteady flow during capillary extrusion of rubber compounds 97
J.Z. Liang

A study on center thinning in the rotary forging of a circular plate 101
H.-K. Oh, S. Choi

Springback in the roller forming of integrated circuit leadframes. 107
M.H. Fu, K.C. Chan, W.B. Lee, L.K. Chan

A finite-element analysis of temperature distributions in spade drilling 112
Q. Shen, T.C. Lee, W.S. Lau

Excimer laser surface modification of engineering ceramics for adhesive bonding 123
H.C. Man, X.M. Zhang, T.M. Yue, W.S. Lau

Numerical analysis of an inside-out tube inversion process 130
H.J. Tan, K.C. Chan

Cell control architecture for manufacturing applications. 137
C.-Y. Chan, A. Redford, F.-W. Lam

Cathode shape prediction in electrochemical machining using a simulated cut-and-try procedure 146
S. Bhattacharyya, A. Ghosh, A.K. Mallik

Elsevier Science S.A.

Some comments on three-dimensional crystallizing π-bondings, fatigue and fatigue limit 153
H.-K. Oh

Flow and mechanical properties of polypropylene/low density polyethylene blends 158
J.Z. Liang, C.Y. Tang, H.C. Man

Error-correcting merit of the volumetrically elastic and deviatorically rigid–plastic finite-element method 165
Y.-M. Guo, K. Nakanishi, Y. Yokouchi

The surface character and substructure of aluminium alloys by laser-melting treatment 172
T.T. Wong, G.Y. Liang, C.Y. Tang

Squeeze casting of high-strength aluminium wrought alloy AA7010 179
T.M. Yue

Friction in bulk metal forming: a general friction model vs. the law of constant friction 186
S.B. Petersen, P.A.F. Martins, N. Bay

Analysis of tube-spinning processes by the upper-bound stream-function method 195
J.-W. Park, Y.-H. Kim, W.-B. Bae

Investigation of the effect of dissimilar interface frictional properties on the process of hollow cylinder upsetting 204
S.Y. Lin

Experimental set-up and data processing of the radial strip-drawing friction test 216
R.J.J.M. Sniekers, H.A.A. Smits

An approach to the quantification of the aptitude of clayey fluids for extrusion using a plastometer test 224
A. Aït-Mokhtar, M. Laquerbe

Precision cutting of sheets by means of a new shear based on rolling motion 232
M. Murakawa, Y. Lu

Rule-based ARIMA models for FMS 240
W.H. Ip

Microstructures and dimensional stability of extruded eutectoid Zn–Al alloy 244
Y.H. Zhu, J. Juarez Islas

Advanced QPQ complex salt bath heat treatment 249
C.F. Yeung, K.H. Lau, H.Y. Li, D.F. Luo

Effects of processing parameters on the performance of Al grain refinement master alloys Al–Ti and Al–B in small ingots 253
H. Li, T. Sritharan, Y.M. Lam, N.Y. Leng

Further investigation of the fine-blanking process employing large deformation theory 258
T.C. Lee, L.C. Chan, B.J. Wu

The system analysis of metal forming technique in welding processes 264
N.D. Lukaschkin, A.P. Borissow, A.I. Erlikh

Experimental analysis of the flattening of the cross-section, the springback and the bending moment of clad tubes in uniform bending 270
S. Mori, K.-I. Manabe, H. Nishimura, K. Hirose

A coupled solidification analysis of materials and cooling roller in direct rolling process 277
C.G. Kang, Y.D. Kim, S.W. Lee,
